

Animals of THE MITTEN

Some great ideas for the use of the animal graphics would be: 1) copy the whole sheet for your students to make patterns. AABBC, ABC etc... 2) use them as counters, creating word problems about how many animals could be in the mitten. (There were two rabbits in the mitten, when an owl and a fox crawled in. How many animals are in the mitten now?)

3) Use these mittens to be stuffed with the above animals for word math problems. 4) The mittens could also be used in a sizing activity, small, medium and a large. 5) Use the mittens to measure length of tables, books and more articles in your classroom.
